Designed your way.

Imagine more

More than an outdoor kitchen. An extension of your home.

Outdoor living has become an integral part of the way we live, entertain and connect with family and friends. A well-designed outdoor kitchen brings those moments together, creating a space that feels every bit as considered as the home itself.

Cabinex makes creating that space simple.

With a proven, engineered system, premium finishes and professional installation, Cabinex gives you the confidence to create an outdoor kitchen that's designed around your home, your lifestyle and the way you love to live outdoors.

Designed around your home

Every home is different, and every outdoor kitchen should be too.

Every Cabinex outdoor kitchen begins with a proven design system that has been carefully engineered to remove complexity without limiting creativity.

Rather than starting with a blank page, Cabinex gives you the confidence of a system that's already been thoughtfully resolved, allowing you to focus on the exciting part - creating a kitchen that suits your home, your lifestyle and the way you love to entertain.

From layouts and appliances to colours and finishes, every decision is supported by a process that's been designed to deliver a beautiful result with confidence.

See it before it's built

Every great outdoor kitchen begins with a great plan.

Creating your outdoor kitchen should feel exciting, inspiring and easy.

The Cabinex 3D Design experience allows you to explore your outdoor kitchen before it's built, giving you the confidence to refine layouts, compare finishes and see exactly how your new outdoor living space will come together.

It's a simple way to visualise your ideas, make informed decisions and move forward knowing every detail has been thoughtfully considered.

Your completed design includes a detailed itemised quotation, so you know exactly what's included before moving forward.

When you're ready, experience your design in your own outdoor living space using Augmented Reality.

Start Desigining!

Experience it in your outdoor living space

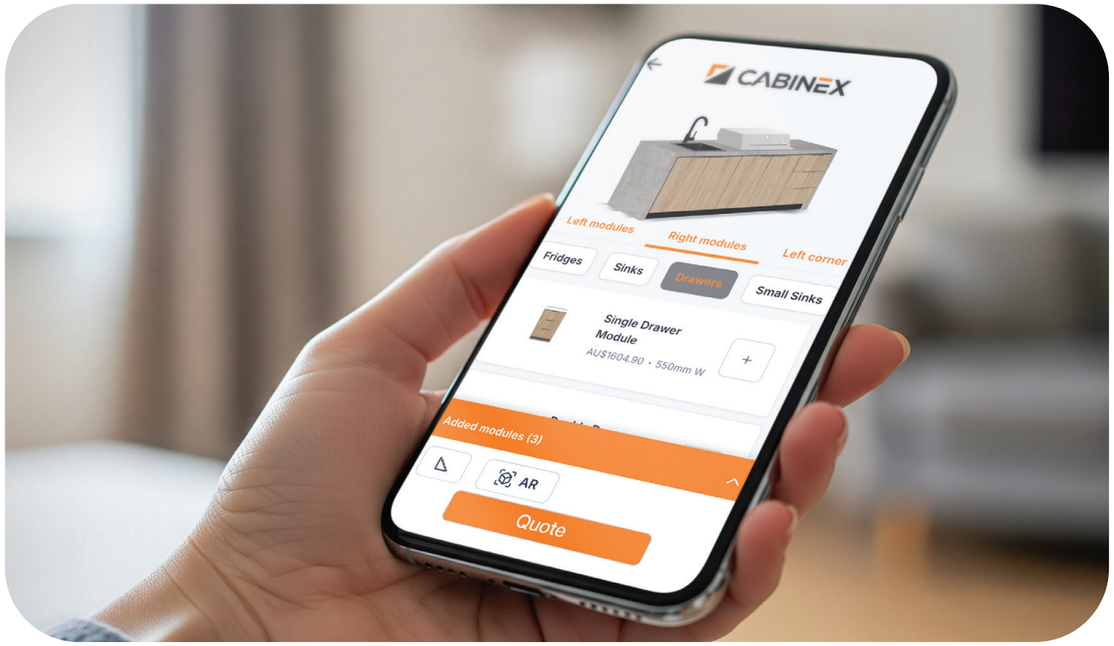

See your future outdoor kitchen where it belongs.

Once you've created your design, it's time to see it come to life.

Using Augmented Reality, Cabinex lets you place your outdoor kitchen into your own outdoor living space, allowing you to visualise proportions, layouts and finishes in the environment where it will be enjoyed for years to come.

It's another way Cabinex removes uncertainty, making every decision feel simple, informed and exciting.

Because seeing really is believing.

Make it yours

Start with the way you love to cook.

Every great outdoor kitchen begins with its centrepiece.

Whether you're firing up the BBQ for a relaxed family dinner or entertaining a crowd, your choice of appliance shapes the way you cook, entertain and enjoy your outdoor living space.

Cabinex has been thoughtfully designed to integrate seamlessly with Gasmate's range of premium built-in BBQs, giving you the freedom to create an outdoor kitchen that's perfectly suited to your lifestyle.

Make it yours

Premium porcelain benchtops and waterfall ends.

The finishes you choose are what make your outdoor kitchen feel uniquely yours, bringing together colour, texture and materials to reflect your home and personal style.

Every Cabinex outdoor kitchen features premium porcelain benchtops with matching waterfall ends carefully selected for their timeless appearance, exceptional durability and refined finish.

Engineered to perform outdoors, porcelain offers exceptional resistance to heat, UV exposure, stains and scratches, making it as practical as it is beautiful.

Available in a carefully curated range of contemporary colours, with matching waterfall ends, each benchtop has been selected to complement the Cabinex collection and create a beautifully cohesive outdoor kitchen.

Make it yours

Complete the look with premium Polytec Alfresco door finishes

The finishing touches are what bring your outdoor kitchen to life.

Cabinex door finishes have been carefully selected to complement our premium porcelain benchtops, creating a beautifully balanced outdoor kitchen that feels considered from every angle.

Manufactured using Polytec's premium Alfresco Compact Laminate range and framed in anodised aluminium, every door is purpose-built to withstand the demands of outdoor living. The 5mm Compact Laminate inserts are completely impervious to water, highly impact resistant, and offer outstanding resistance to stains, scratches and everyday wear, ensuring they maintain their premium appearance for years to come.

Available in a carefully curated selection of colours and finishes, it's easy to create an outdoor kitchen that reflects your home and personal style.

Built with confidence

Every detail considered.

A beautiful outdoor kitchen is about more than what you can see.

Every Cabinex outdoor kitchen is built from a collection of carefully designed modules. From BBQ and sink modules to refrigeration and storage, each one works seamlessly together to create a kitchen that's uniquely yours.

Built with confidence

Quality comes standard. Built to last.

A beautiful outdoor kitchen should do more than look exceptional. It should be built to perform for years to come.

That's why every Cabinex outdoor kitchen combines premium materials, thoughtful engineering and quality hardware to deliver lasting performance in outdoor environments.

From waterproof cabinetry and our AirFrame™ thermal barrier system to premium hardware and a **10-year structural warranty**, every detail has been carefully considered so you can enjoy your outdoor kitchen with complete confidence.

Stainless Steel Sinks

Designed to integrate beautifully.

Sink modules feature premium integrated sinks, available in stainless or dark stainless steel, combining everyday practicality with a refined contemporary finish.

Gooseneck Mixer Tap

The finishing touch.

Available in matte black or chrome, our elegant gooseneck mixer taps complement every Cabinex kitchen and your choice of finish.

10-Year Structural Warranty

Confidence that lasts

Every Cabinex outdoor kitchen is backed by a 10-year structural warranty, giving you confidence that it's built to perform for years to come.

Waterproof Cabinetry

Designed for life outdoors.

Constructed with waterproof PVC panels, Cabinex cabinetry won't crack, split or deteriorate over time.

AirFrame Thermal Barrier

Protection where it matters most.

Every BBQ module features our AirFrame thermal barrier system, helping reduce heat transfer and protect the surrounding cabinetry from excessive heat during cooking.

Premium Hardware

Quality in every detail.

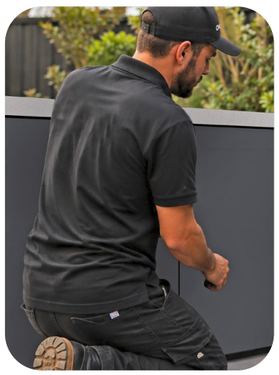

From hinges and runners to handles and fittings, every component has been carefully selected for lasting durability and everyday performance.

WaterMark Approved

Designed with confidence.

All mixer taps are WaterMark certified, providing confidence they meet New Zealandn plumbing standards for quality and performance.

Professional Installation

Installed with care.

Every Cabinex outdoor kitchen is professionally assembled and installed, ensuring every outdoor kitchen is fitted accurately and to the highest standard.

Ergonomic Finger Pull Handle

Designed for everyday living.

The sleek black ergonomic finger pull handle delivers a clean architectural look while remaining comfortable and practical to use every day.

A Considered Detail

Don't overlook the finishing touches.

Include a rangehood in your outdoor kitchen to help create a cleaner, more comfortable cooking environment. It's best considered early in the design process.

Before you design

Before designing your outdoor kitchen, it's important to consider where it will be installed and ensure the location is suitable. A little planning now will help ensure a smooth installation later.

It is recommended that your **Cabinex Outdoor Kitchen is assembled, installed and positioned wholly or partially under cover.** This will protect the unit from the elements and generally keep it cleaner.

When positioning the outdoor kitchen, it must conform to New Zealand Standards. i.e. open ventilation and also distance to combustible surfaces. Refer to your BBQ instruction manual for more details.

LPG Installations – Where an LPG BBQ is selected, the installation will incorporate the required gas cylinder ventilation to ensure safe operation and compliance with relevant New Zealand Standards.

Planning and location of water, waste, power and gas services.

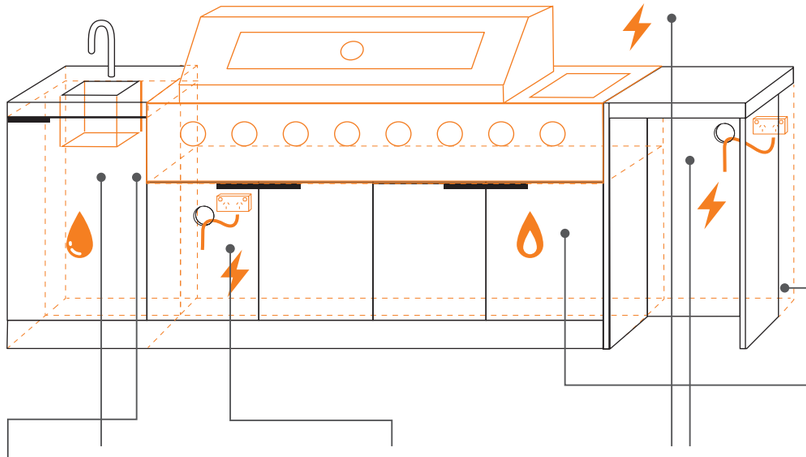

Ideally the floor surface should be level, clean and suitable for the cabinet installation along with water, waste, power and gas services, being able to be roughed in and compliant with all required New Zealandn standards.

The services being roughed in should be left long enough to enable them to be fitted off inside the relevant cabinets after they have been installed.

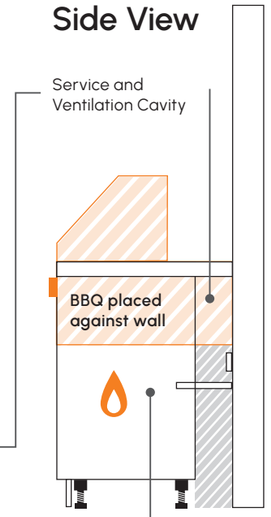

Your design and layout of your outdoor kitchen will dictate where you will need to install all relevant water, waste, power and gas services.

***Note: All plumbing and electrical work must be done by a registered trades person**

350mm
From Back Wall

ELECTRICAL - BBQ
Most BBQ's have lights and may require 240V power.

This is best located on the back left hand side as high as possible.

500mm
From Floor Level

300mm
From Back Wall
to allow for a connection

ELECTRICAL - FRIDGE & APPLIANCE
The fridge requires 240V Power.

If the power point is mounted in the fridge module, the plug on the fridge may need to be changed to a side entry plug to allow the fridge to be pushed back into the cabinet.

The preferred method is to have the power point in the cabinet module next to the fridge.

Cut a hole 50mm diameter in the fridge module to allow for plug access.

You may require power for a Rotisserie or other electrical appliance above your benchtop working surface.

Natural ventilation requirements

Currently for residential premises, barbecues are certified under a domestic appliance standard and classified as outdoor appliances. An outdoor area is considered to be open to natural ventilation.

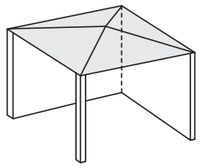

When is an alfresco considered 'outdoors'?

- A covered alfresco area is considered outdoors when it is an open-air situation with natural ventilation.
- If the alfresco meets the below minimum requirements, it is considered that natural ventilation is provided and an outdoor domestic BBQ may be used.
- If the alfresco does not meet the below minimum requirements, it is considered an enclosed alfresco and additional requirements must be satisfied.
- For additional information, see Energy Safety publication – "Safe locations for using barbecues and gas patio heaters".

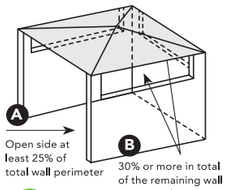

Compliant Examples:

Not more than:
- Two parallel walls with a covered roof.

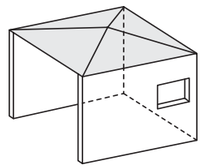

Not more than:
- Two walls at right angles with a covered roof.

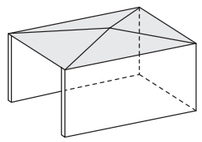

Not more than:
- Three walls,
- with the one open side being at least 25% of the total perimeter (A).
- The remaining three walls having an area of 30% or more of unrestricted opening (B).

Note: the above applies to a fully detached alfresco and or an alfresco sharing a house wall. If your BBQ area does not look like the above 'green ticked' area, your area will be considered "Enclosed"

Non-Compliant Examples:

- Remaining 3 walls do not have 30% or more of unrestricted opening.

- Open side is less than 25% of the total perimeter.

Imagine what's possible.
